

FireflyTM

Resource Management System

Operational Intelligence for
Sustainable Infrastructure

Measure. Visualize. Improve.

Resource Optimization • Accountability • Operational Intelligence

One Platform. Multiple Systems.

Firefly monitors:

- ESG Metrics & Reporting
- Energy
- Water
- Air Quality
- Pumps & Utilities
- Buildings & Campuses
- Machinery & Plants
- Waste Management

Get Started Today

See Firefly in action. Book a free demonstration and discover what operational intelligence can do for your infrastructure.

See What Matters

Real-time visibility across your operations

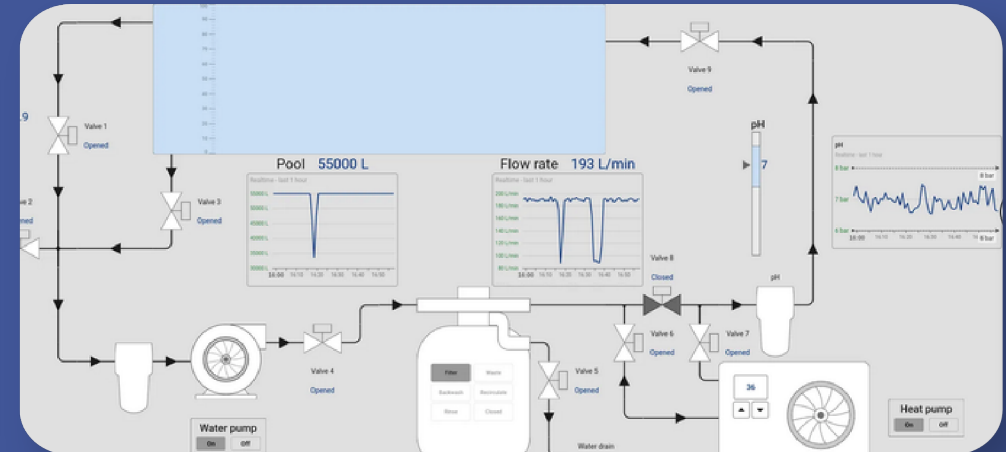

- Live dashboards for energy, water, and utilities
- Automated updates and calculations
- Historical trend analysis at your fingertips
- Multi-site visibility from a single interface

Resource Optimization

- ✓ Reduce consumption through measurement
- ✓ Identify inefficiencies automatically
- ✓ Track improvements over time
- ✓ Simplify sustainability reporting

Accountability Drives Performance

Assign ownership. Measure outcomes. Improve continuously.

- Assign resources to teams
- Track consumption against targets
- Automated performance scorecards
- Clear audit trails for compliance

Operational Accountability

- ✓ Behaviour change through visibility
- ✓ Effective utilization
- ✓ Clear ownership
- ✓ Track compliance targets consistently
- ✓ Enable data-driven decision making

Featured On

Industrial Grade

- Operating for 5+ years
- Reliable in demanding field environments
- Remote updates and continuous improvement
- Scalable from a single site to multi-site operations

Why Firefly

#	Firefly	Traditional SCADA
1	✓ Rapid deployment	Long implementation
2	✓ Modern web interface	Legacy interfaces
3	✓ Expandable	Difficult upgrades
4	✓ Cost-effective	High licensing costs

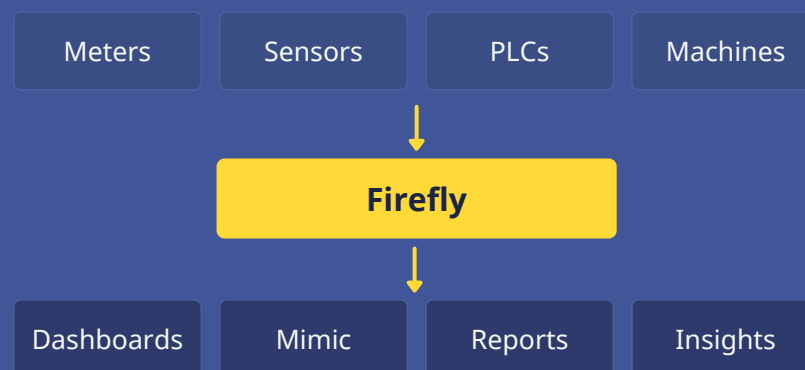

Trusted By

Expected Outcomes

Firefly delivers:

- Reduce energy and water losses
- Detect faults before they become failures
- Improve operational response times
- Eliminate manual data collection
- Simplify ESG and sustainability reporting
- Increase equipment uptime
- Support data-driven maintenance decisions
